FEEDING DIRECTIONS

Food requirements will vary depending on breed, environment, temperature and stress factors. Highly active, athletic dogs will require an additional amount of food depending on their level of activity. Food intake should be adjusted to maintain optimum body weight. Provide clean, fresh water at all times.

Puppies – may be fed to puppies at approximately four weeks of age. Introduce dry dog food to puppies by moistening with water. It is recommended that puppies be fed at least three times per day. Adjust feeding amounts according to the guideline below.

Gestating/Lactating Females – may require additional amounts of food to maintain desired body condition. Adjust feeding rate accordingly.

Weight (lbs.) Daily Amount

Up to 25 lbs. 1/2 - 1 1/2 cups
